

THOR-50M Euro NCAP SBL-A Update

Publication Date: January 2017

NCAP at SBL-A and also offers upgrade kits for previously delivered dummies.

Upgrade Components

The following component list describes the latest parts needed to bring THOR-50M ATDs from the March 2016 design* up to SBL-A (Euro).

**See also March 2016 Design Change History bulletin for previously updated components.*

Humanetics now offers the THOR-50M Standard Build Level A (SBL-A) which is intended to meet the drawings and qualification specifications defined in the National Highway Traffic Safety Administration (NHTSA) NCAP Request for Comments (Docket ID 2015-0119) and specified by the European New Car Assessment Program (NCAP) for use in Euro NCAP testing protocols. SBL-A follows the August 2016 drawing package with some minor part upgrades. The Testing Summary section of this bulletin documents the current Qualifications standards and accord.

Humanetics is now shipping all ATDs for use in Euro

472-KIT-EU-A - UPGRADE KIT FROM MARCH 2016 DESIGN TO SBL-A, EURO (Includes the following parts)

Part Number	Description	Qty Req'd	Comments	
472-2150-A	FRONT CABLE ASSEMBLY, NECK	1	Longer cable <i>Affects head and neck certification</i>	
472-2108	CENTER CABLE, LOWER BUSHING 2, NECK	1	Added to replace center cable washer to reduce chance of rattling of the cable.	
472-4627-A	UPPER ABDOMEN BAG	1	Zipper on top to avoid interaction with IRTTRACC.	
472-4763-A	LOWER ABDOMEN BAG ASSY	1	More relaxed fit and repositioned IRTTRACC holes upward. <i>May affect abdomen impact results</i>	

(Con't)

THOR-50M Euro NCAP SBL-A Update (Con't)

Part Number	Description	Qty Req'd	Comments	
6004781	TAPE, DOUBLE SIDED	1	Tape used to attach lower abdomen front and rear foam pads together.	
11442	A.S.I.S COVER	2	A.S.I.S. load cell cover with rounded corners to reduce risk of pelvis flesh and seat belt tearing.	
472-3410-A	MID-STERNUM BONDING ASSEMBLY WITH STRAPS	1	Added straps around foam layer assembly to prevent tearing of foam.	
9003938	WASHER, LUMBAR SPINE FLEX JOINT ASSEMBLY	4	Update PTFE washers on Lumbar Spine Flex Joint Assembly (472-3646) and Upper Thoracic Spine Flex Joint Assembly (472-3746) to be zinc which improves the durability. <i>Updated on production dummies 9/9/2016</i>	
476-3780-KIT	SPINE BOX ASSEMBLY, ADJUSTABLE	1	Spine pitch change for easier handling and the reduction of risk in positioning errors.	
472-4761-A	REAR ATTACHMENT PLATE	1	Update mounting hole location and tolerance to remove potential interference with the iliac wings.	

THOR-50M Euro NCAP SBL-A Update (Con't)

Part Number	Description	Qty Req'd	Comments	
472-8110	UNIVERSAL JOINT, MOD THOR-M	4	More robust solution using shoulder as retainer instead of a snap ring. <i>Updated on production dummies 8/25/2016</i>	
472-3530	IR-TRACC CONNECTING BOLT, LOWER THORAX	2	Added a stub at the back and a 3 hex hole to facilitate the installation of the lower thorax IRTRACCs. <i>Updated on production dummies 9/20/2016</i>	
Optional Spare Parts				
Part Number	Description	Qty Req'd	Comments	
472-3901-A	FRONT/REAR PANEL, ASSY, JACKET*	1	Longer strap and orientation of tapering changed for handling purposes.	
472-8510-A	H-POINT TOOL	1	Triangle outer shape similar to NHTSA design - Tighter fit in iliac to eliminate variability.	
472-4375-A	STRUCTURAL REPLACEMENT A.S.I.S LOAD CELL	2	A.S.I.S. load cell structural replacement with rounded corners to reduce risk of pelvis flesh and seat belt tearing.	

(Continued)

THOR-50M Euro NCAP SBL-A Update (Con't)

EuroNCAP has not adopted the THOR Lx Leg with molded shoes, instead the H3-50th lower legs and Eurofeet have been identified as the requirements.

The parts required to attach the standard H3-50th lower legs to the THOR are as follows:

Part Number	Description	Qty Req'd
472-5810	KNEE STRUCTURAL REPLACEMENT	2
5000204-FT	SCREW FHCS M6 X 1 X 10	16

Note: Modified FHCS screws (472-5101) are needed to attach the HIII 50th knee clevis load cell to the THOR upper leg.

- For additional information reference the August 2016 THOR/HIII 50th Legs Bulletin.

RMA Re-certifications

All incoming THOR-Ms sent to Humanetics for re-certification must conform to a Standard Build Level A (SBL A) kit prior to testing. Dummies may require additional parts if ATD is not up to the March 2016 design.*

**See also March 2016 Design Change History bulletin for previously updated components.*

THOR-50M Euro NCAP SBL-A Update (Con't)

Testing Summary

Certification Test	SBL-A Procedure	SBL-A Corridor	Parameters that Differ from NQP	
Head Impact	NQP AUG16	NQP AUG16
